TABLES

Group Four's Post Leg tables are ideal for virtually every setting, especially where the floor space requires a minimum of clutter. The 7000 Post Leg is available with a flat or domed bottom. A cap detail is standard for the 9000 Glass tables, and is an option for laminate tops.

The 7300 Library Table utilizes a formed steel connector at each corner to join the legs with a 2 inch apron. The legs, connector and apron are KD, and can be supplied in different finishes. The 7000FT Folding Table allows square and round tops to be offered with a folding base. Its 1-1/2 inch diameter legs result in a thin profile when folded, providing for compact stacked storage.

Group Four's 6100 Cast and 6200 Disc bases consist of a separate base and column, so matching or contrasting finishes may be specified. The Cast base is available in five designer patterns, all standard with adjustable glides. The 6000 Trumpet base is of one-piece welded spun steel. The bottom of the rim is self-levelling, making glides unnecessary. Bases are standard at 29 inches high; custom heights are available, including bar-height tables with optional footings.

Group Four table top surfaces are plastic laminate or wood veneer on 1 inch particle board. Edge treatments include laminate self-edge; flat and bullnose PVC edges in colours to match epoxies; flat and bullnose hardwood edging; and a variety of profiles in SoftEdge, an integrally moulded, semi-soft elastomeric urethane. Clear laquer finish is standard for wood and veneer; custom stains are available.
